Notes for Summary Output

Maximum Speed	Green background for original maximum speed in knots, yellow background for damaged speed.
Guns	Green background for original number of primary battery guns, yellow background for remaining operational guns.
Ammo	Percent of primary battery shells remaining.
Flotation	Percent of hull flotation remaining.
Hits Received	AP: Heavy caliber armor piercing shell hits HE: Heavy caliber shell hits other than AP Med: Medium caliber shell hits Lt: Light caliber shell hits UW: Torpedo or mine hits
Damage Status	Overall condition of the ship, considering primary guns, propulsion and hull.
Expected %	Estimate of the percentage of primary and secondary battery hits if the random factors were average.
Hit %	Actual percentage of primary and secondary battery hits achieved. Large differences between expected and actual are generally associated with small numbers of shells fired.
Hit % (last column)	Actual percentage of torpedo hits achieved. Blank if no torpedoes were fired.
